MICROWELL

**Wi-Fi module
for HP GREEN INVERTER Pro
swimming pool heat pump**

Registration and pairing guide

Version: 02/2023

INVENTOR, PREMIUM, GREEN WINTER

By downloading and using this application You accept that Microwell, spol. s.r.o. is a third-party application broker and is not responsible for any technical conditions of its use.
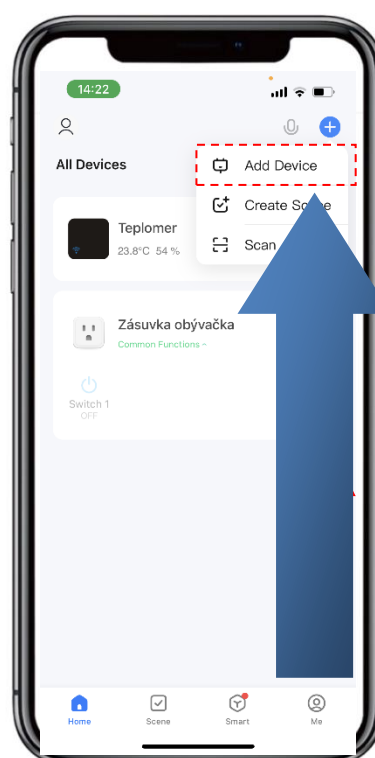

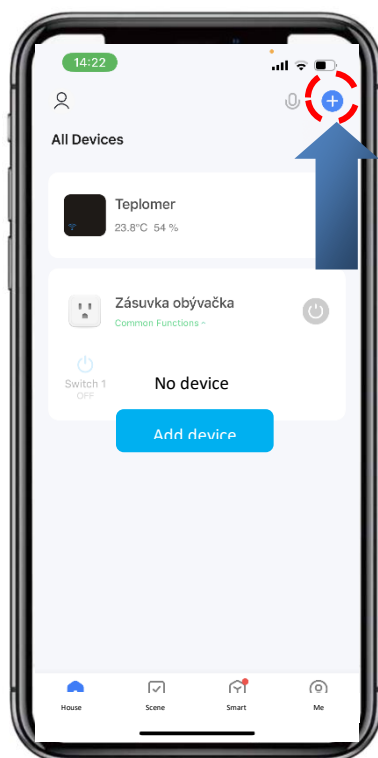

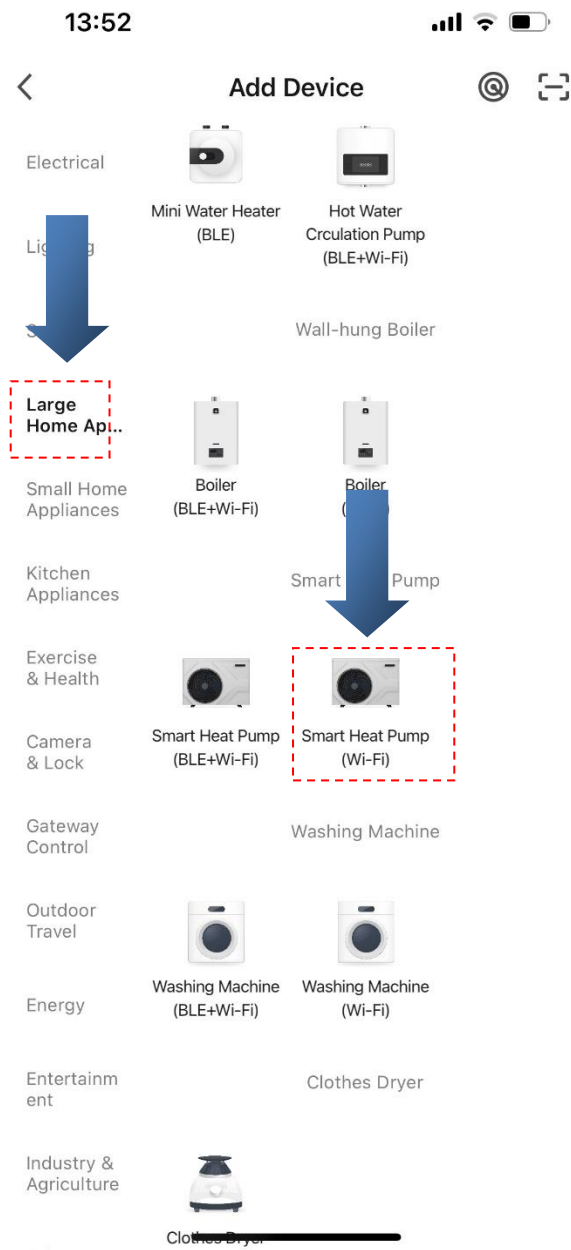

Select "Large home appliances" and then select "Smart Heat Pump (WIFI)"
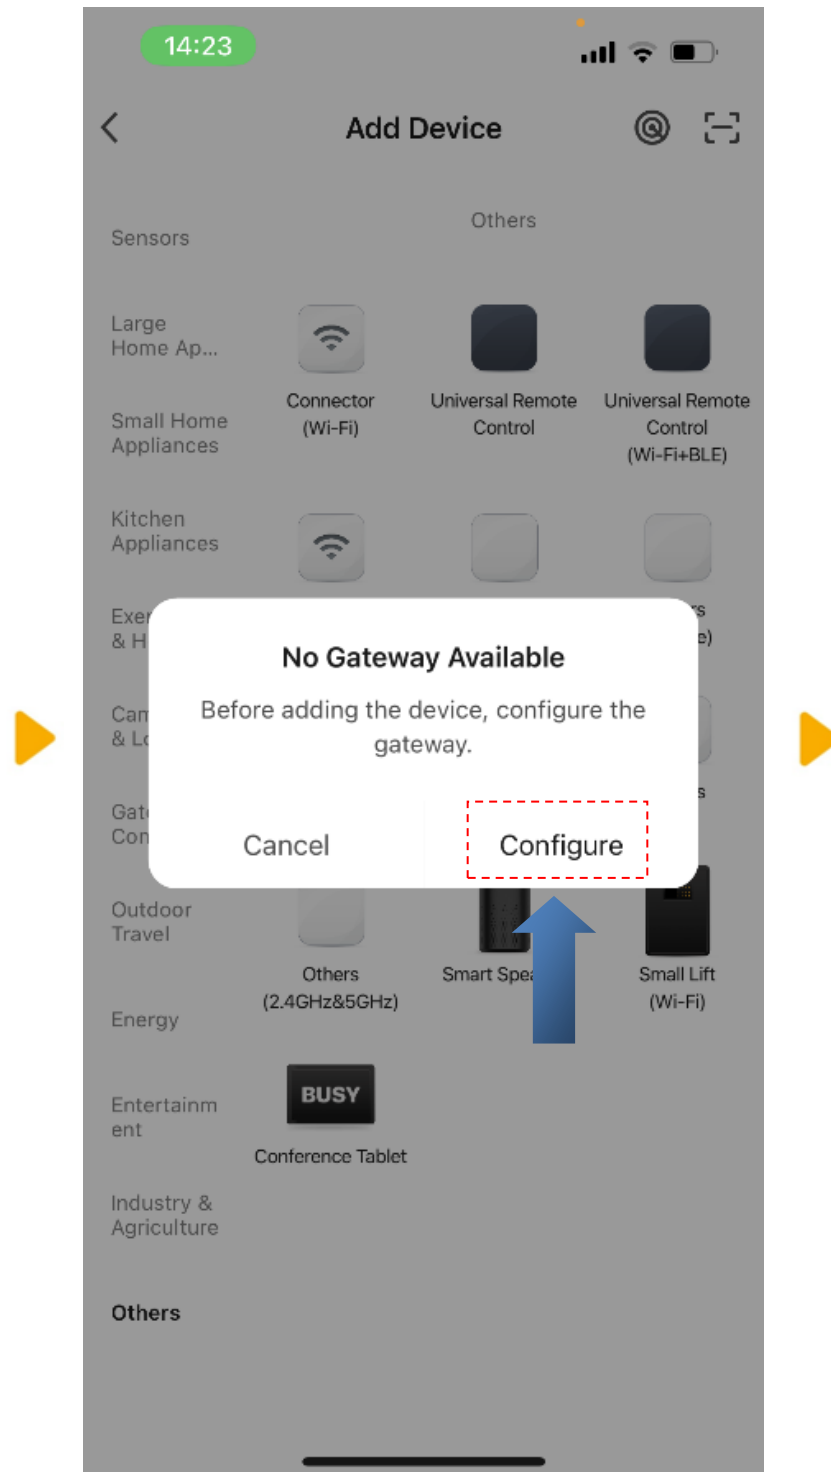

Select Configure

The application now informs you that you should activate the WIFI module. Please note that this procedure is only available if your heat pump is installed and powered on. You also will need an appropriate internet connection.

BUTTON

**Explanation of indicator LEDs on the Wi-Fi box:**

Power indicator LED: Lighting red LED is indicating that the heat pump is powered.

Wi-Fi indicator LED: If there is no connection to the router the LED is flashing slowly. After pushing it for 3 secs while pairing it is flashing quickly. If there is connection to the router the LED lits continuously.

Communication indicator LED: If the wire communication is OK between the boards the LED is flashing accordingly, if the box is unable to communicate the LED goes off after 2 minutes

③ Operation

Indicate the Boost/Silence mode

The current swimming pool water temperature

The setting temperature

Select Heating/ Cooling Function

Select Boost/ Silence Mode

Timer

On/Off
